

1SLR KEIU

RAIN JACKET, EN 343

Description

The Japanese have no less than 50 words to describe rain. Our Keiu rain jacket was named after the first "welcome rain" after a long period of drought. While wearing our new Keiu jacket you will welcome the rain. The jacket is fully waterproof and breathable; this will make the jacket more comfortable to wear without getting too hot while working. Its ergonomic fit is modern and stylish. The fluorescent orange makes sure that you can be seen in daylight as well as at night. In addition the jacket has good styling details, ventilation zippers, a hood that is stored in the collar, deep pockets and an extended back to avoid rain running into the back of your trousers. So welcome rain!

Product details
